

# SAVE-THE-DATE

*Thursday, Sept. 25th –  
Saturday, Sept. 27th, 2025*

## **Inaugural CHOP Complex Care Conference HUB for Clinical Collaboration**

This two-and-a-half-day conference is intended for physicians, nurses and advanced practice providers who currently care for children with medical complexity (CMC) or who are interested in learning to care for this population. This one-of-a-kind program offers an array of didactic and interactive sessions that will cover key complex care content areas, including review of current diagnostic and management strategies, care of technology dependent children, and innovations in research, medical education, patient advocacy and models of care. Through learning, sharing and networking, the goals of this educational conference are to give our collaborative community the tools necessary to best care for CMC and support their families.

- Concurrent dynamic sessions for multiple levels of learners and leaders
- Discussion of evidence-based guidelines and best practices
- Networking and mentorship opportunities
- Hands-on medical technology demonstrations
- Opportunity to earn CME credits
