## Course Overview

In this course, general pediatric providers will learn about common general pediatric conditions and concerns, including newborn genital anomalies, atopic dermatitis, allergies and oral contraceptives. Experts will explore current guidelines and standards of care for each topic, along with practice management pearls related to billing, time management or referrals. In addition, we will explore hot topics as we look back on the top journal articles of the past year.

## General Information

The registration fee includes access to the conference live stream, online presentations, and CME credits.

**Registration fee:** \$75

## Course Objectives

Upon completion of this course, participants will be able to:

- Identify neonatal genital anomalies and the timeline for intervention
- Differentiate topical steroids by potency and appropriate duration of use by body location for the treatment of atopic dermatitis
- Explore new treatment options to manage pediatric allergies
- Explore options for initiating oral contraceptives
- Determine appropriate and timely referrals to specialty care for a variety of common pediatric concerns and diagnoses, including hypospadias, atopic dermatitis and food allergy

## Joint Accreditation Statement

In support of improving patient care, this activity has been planned and implemented by the Children's Hospital of Philadelphia. The Children's Hospital of Philadelphia is jointly accredited by the Accreditation Council for Continuing Medical Education (ACCME), the Accreditation Council for Pharmacy Education (ACPE), and the American Nurses Credentialing Center (ANCC), to provide continuing education for the healthcare team.
