

Advances in Neonatology: Focus on Medication Safety and Efficacy

Thursday, October 15, 2026

**HUB Clinical Collaboration Building
at Children's Hospital of Philadelphia**

Course Overview

Neonatal healthcare providers are frequently challenged with the safest and most effective medication to choose for their patients who are in the neonatal intensive care unit. This one-day course will provide an overview of medication safety and specific medication updates, including indications, dosing and safety considerations. Ample time is available to share the different perspectives of pharmacists, nurses, APPs and physicians, and increase attention to medication safety.

General Information

The conference will be held in the Hub for Clinical Collaboration at the Children's Hospital of Philadelphia. The registration fee is \$200 and includes continental breakfast, breaks, lunch, parking and syllabus material.

Course Objectives

- Describe medication safety challenges and prevention strategies in the Neonatal Intensive Care Unit
- Describe methods to educate staff on principles of medication safety practices
- Identify principles of medication safety to diuretic prescribing in preterm infants
- List interprofessional team communications strategies that enhance medication safety in the Neonatal Intensive Care Unit
- Describe the need for antibiotic stewardship in the Neonatal Intensive Care Unit
- Recall how effective collaboration impacts patient care during emergency events
- Describe acute treatment of hyperkalemia
- Describe management of hyponatremia with vasopressin
