Where Perspectives Meet: Building Evidence-Informed Integrative Pediatric Practices

Wednesday, November 4, 2026
9am – 5:15pm

Virtual conference with option to view in-person
with the Integrative Health Team at CHOP

Course Information

Where Perspectives Meet: Building Evidence-Informed Integrative Pediatric Practices invites clinicians, researchers, and students to explore the evolving landscape of whole-child health. This year's program brings together leading voices to examine the pediatric microbiome, evaluate mind-body modalities, unpack the science behind popular diets and supplements, and strengthen our collective ability to counter health and wellness misinformation. Through interdisciplinary dialogue and a shared commitment to evidence-informed care, the conference aims to advance integrative pediatric practices that are both innovative and grounded in rigorous science.

General Information

The conference will be virtual with an option to view in-person and meet the Integrative Health Team at Children's Hospital of Philadelphia. The registration fees, which include syllabus material and handouts, are as noted regardless of in-person or virtual attendance. If you sign up for in-person and wish to attend virtually, you **MUST** notify us by 10/23/26.

Physicians: \$175

Nurses, Registered Dietitians, Nurse Practitioners, and Other Allied Health Professionals: \$125

Residents and Fellow: \$75

Students: \$25

Course Objectives

- **Describe** current evidence on the pediatric microbiome and its implications for integrative clinical practice
- **Evaluate** the effectiveness and safety of mind-body modalities, popular diets, and commonly used supplements in pediatric populations
- **Identify** strategies for addressing and correcting health and wellness misinformation encountered by families and caregivers
- **Integrate** evidence-informed approaches from multiple disciplines to support whole-child, patient-centered pediatric care
