COURSE INFORMATION

COURSE OVERVIEW

The Diabetes Center for Children at Children's Hospital of Philadelphia is offering a course for nurses practicing in a variety of sites where children with diabetes are entrusted to their care. Nurses who provide care to children in schools, homecare settings, primary care offices and behavioral health settings, and those involved in child protective services and case management will benefit from this workshop.

This course is designed to provide a solid foundation in current diabetes management. Topics to be reviewed will include: treatment of type 1 and type 2 diabetes; self-care management principles; understanding and using diabetes technology (insulin pumps and continuous glucose monitoring systems) to improve outcomes; and effect of psychosocial factors on children and families living with diabetes.

GENERAL INFORMATION

The conference will be held on Saturday, Oct. 13, 2018, in the Ruth and Tristram Colket, Jr. Translational Research Building on the Raymond G. Perelman Campus. Registration will begin at 8 a.m. The \$125 registration fee includes a light breakfast, breaks, lunch, syllabus materials and parking.

COURSE OBJECTIVES

Upon completion of this course, participants should be able to:

- Describe social determinates of health and how they impact health outcomes of children with diabetes
- Describe current practice guidelines for treating type 1 diabetes and optimizing health outcomes for children
- Demonstrate a basic understanding how technology (insulin pumps, closed loop systems and continuous glucose monitoring systems) can be used to improve diabetes outcomes
- Demonstrate familiarity of how to use diabetes technology to manage children with diabetes
- Describe how psychosocial factors impact diabetes outcomes and quality of life
- Understand principles of current of type 2 diabetes management
