PEDIATRIC CLINICAL HYPNOSIS WORKSHOP Fundamentals of Pediatric Clinical Hypnosis

Roberts Center for Pediatric Research
2716 South St. • Philadelphia, PA 19146

In this three-day workshop, attendees will learn how to use hypnotic language and skills to construct therapeutic suggestions based on individualized goals. There will be extensive experiential learning consisting of large group exercises and supervised small group practice focused on the structure, elements and language of clinical hypnosis with children and teens. Attendees will also learn how to explain hypnosis to parents and children and the uses of self-hypnosis. Internationally renowned faculty from NPHTI will be teaching the course.
