COURSE OVERVIEW

The primary care provider for children frequently faces challenges in the diagnosis and management of allergic, immunologic and infectious disorders.

This course is intended to provide a practical review and an update of new trends and published guidelines in these areas for pediatricians, family practitioners, nurse practitioners, nurses and other healthcare professionals.

COURSE OBJECTIVES

After attending this program, the participant will be able to:

- Review biologic therapies currently available to treat allergic diseases as well as those under investigation
- Discuss special considerations for the immunocompromised patient with COVID-19
- Discuss current therapeutics for the management of food allergies as well as future interventions
