## Immune Dysregulation Without Borders

Mark your calendars for our upcoming symposium in which we will explore the many ways diagnosis in immune dysregulation diseases remains elusive, and the importance of multidisciplinary collaboration and inclusion of precision diagnostics and genetics to solve the mystery. The event will include cutting-edge talks, provocative cases and more. Keynote speakers include:

- **Dusan Bogunovic, PhD**, Associate Professor at the Precision Immunology Institute, Mindich Child Health and Development Institute, Icahn Genomics Institute, and Departments of Oncological Sciences, Microbiology and Pediatrics at the Icahn School of Medicine at Mount Sinai
- **Lauren Henderson, MD, MMSc**, Attending Rheumatologist and Assistant Professor of Pediatrics at Boston Children's Hospital
- **Alexandra F. Freeman, MD**, Pediatric Infectious Diseases Physician at the National Institute of Allergy and Infectious Diseases at the National Institutes of Health

*In this full-day hybrid seminar, attendees will gain an understanding of:*

- How to utilize advanced diagnostics for immune dysregulation conditions
- How genetics can aid in diagnosing diseases of immune dysregulation
- How to forge effective multidisciplinary collaborations for complex patient care

**An invitation with registration and event details will circulate in Spring 2023.**
