COURSE OVERVIEW

This course will provide a wide overview of complex topics of atopic diseases. New therapeutics continue to become available and new indications and approvals have changed treatment options for patients. The course will review atopic diseases from perspectives of multidisciplinary specialists. Participants will be offered a hands-on session with experts on managing allergic reactions as well as discuss difficult cases many clinicians face.

TARGET AUDIENCE

This course is intended to provide a practical review and an update of new trends and published guidelines in these areas for allergists, pediatricians, family practitioners, nurse practitioners, nurses and other healthcare professionals.

OBJECTIVES

Upon completion of this course, participants will be able to:

- Define patients with atopic dermatitis who need additional evaluation
- Describe how to incorporate the newly approved drug treatment into the care of patients with food allergy
- Describe concerning signs in a patient with a history of hives

REGISTRATION

The conference will be held at Children's Hospital of Philadelphia in the HUB Auditorium. The registration fee includes registration materials, breakfast, lunch, and breaks.
