COURSE INFORMATION

Overview

This one-day program will provide neonatologists and neonatal healthcare providers with the most up-to-date information on a variety of complex physiologic issues in neonatology. Research and technology are constantly expanding. This program will review some of the latest therapies used in treating the sick neonate.

General Information

The conference will be held Wednesday, Oct. 10, 2018, in the Ruth and Tristram Colket, Jr. Translational Research Building on the Raymond G. Perelman Campus. Registration will begin at 7:30 a.m. The \$125 registration fee includes continental breakfast, buffet lunch and program materials.

Objectives

Upon completion of this CME activity, participants will be able to:

1. Describe advances in fetal surgery over two decades
2. Describe the pathophysiology and treatment options for lymphatic disorders in neonates
3. Discuss the consequences of different feeding strategies on outcomes for preterm infants
4. Recognize the impact of the opioid crisis on perinatal morbidity by understanding prenatal and neonatal management
5. Describe the potential use of a vaccine to prevent perinatal GBS infection
6. Explain the utility of new radiological techniques for evaluating neonates
